### Automotive Service and Technology

#### 2015-16

**Associate in Science Degree in Automotive Services and Technology**

The A.S. degree is designed for second year automotive students. The well-rounded student graduating from the program will be a leader, prepared to own or manage a business or to transfer to a four-year university. Students can complete courses required for the one-year certificate in the first year of study. Advanced automotive courses can be taken with general education requirements during the second year. Second year students often work in a part-time job and receive credit for Automotive Work Experience.

**Careers in Automotive Technology**

Students who graduate with an A.S. degree can work as a full-time automotive technician or continue in education at Cal Poly or other CSU campuses with a major in Industrial Technology, Industrial Management, Mechanical Engineering, Agricultural Management, or other technical areas of study. Past SBCC Automotive Associate Degree graduates have become teachers, managers in industry, construction managers, and zone representatives or trainers for automotive manufacturers. Students who have received Automotive Work Experience credit while at SBCC find this to be a plus on a job resume after completing their studies.
