Marine Diving Technician

2017-18

Associate in Science Degree for Marine Diving Technician

A.S. Degree Marine Diving Technician program trains professional commercial divers and technicians. The program is open to part-time and full-time students for both diving and non-diving related coursework. The training curriculum includes instruction in all phases of commercial diving, hyperbaric medicine, marine science, boating, bell/saturation diving emergency medicine, and remote operated vehicles (ROV's) to name but a few. *Teamwork and Safety* are the prime emphases of marine technician training. Students completing the full Associate in Science program are also eligible for industry certifications which are required for employment. The A.S. degree increases the diversity of career paths and employability of graduates within the marine industry. A.S. degree students train in marine technology and supplement their skills with specialized technology classes and general education requirements.

Careers in Marine Technology

The Marine Technology Program is designed to meet the growing needs of the marine and diving industries that are engaged in underwater construction, research and the worldwide development of marine resources. Graduates can pursue multiple marine career paths in marine and underwater technology working above and below the water with many types of sophisticated marine data collection instruments, diving and life-support equipment. Jobs vary from skilled divers working with all types of equipment above and below the water to the management of marine resources, mariculture, boating, SCUBA, oceanography, research and education.

Admission Requirements: The program is open to all interested students to both diving and non-diving classes.

- 1) Non-diving students submit SBCC Application to Admissions Office
- 2) Students enrolling in diving classes, provide proof of diving certification and submit the Department Application for Diving.
