Santa Barbara City College

Media Arts

2017-18

Associate in Arts Degree in Media Arts

Multimedia is a field of study and an industry emerging from the synthesis of communication networks and cross-disciplinary media development processes. The advent of digital technologies, media authoring, storage and distribution in conjunction with traditional media production processes has created this confluence of what is often referred to as new media, digital media or multimedia.

The Multimedia Arts curriculum develops students' aesthetic and technical competence by providing training in state-of-the-art software, production processes, theory and concepts. The program prepares students for employment in applied media industries or for transfer to media programs at 4-year institutions. Our courses give students a core background in art, design, and technical skills in media development, production and distribution.

Currently, the program offers 2 fields of study with a number of electives. These electives range in specialization from web design and development authoring, sound design and engineering to 3-D animation and effects compositing. Students may seek an Associate of Arts Degree or pursue a more rigorous and concentrated Certificate.
