Associate Degree in Nursing

The Registered Nursing Program is offered for qualified men and women to prepare for staff nurse positions in hospitals and similar health agencies. Graduation from SBCC with an Associate Degree and a major in Nursing qualifies graduates to take the State Board Examination for licensure as a registered nurse.

This is a 2-year program of study in preparation for RN licensure. Nursing courses offered on campus are integrated with clinical nursing experience in community hospitals and health agencies. Advanced placement is dependent on past experience, clinical competence, and knowledge of nursing content. A nursing course may be challenged based on a student's prior education or experience in accordance with college policy. Completion of the program requires a "C" minimum in all required and support courses, and a 2.0 average in all coursework taken at SBCC.

A separate application to the ADN program is required. Applications are available in the Health Technologies office (A-218) and on the SBCC School of Nursing web page. The selection process for qualified applicants is based on a multi-criteria point formula. Information meetings regarding application, multi-criteria and curriculum are held one time each month during the school year. Contact the Health Technologies Office for more information (Ext. 2366, 8-4:30 p.m. daily.)
