Santa Barbara City College

Business Administration for Transfer
2017-18

Associate in Science Degree in Business Administration for Transfer

The Business Administration program gives students general business knowledge in managerial controls, economics of business, human resources (personnel), labor relations, business risks, interaction of government and business law, production and distribution. They provide the foundations for areas of specialization, such as accounting, finance, or marketing management.

The Associate in Science degree in Business Administration for Transfer will provide the foundational knowledge in Business to students who want to earn a Baccalaureate Degree in Business Administration. This degree is in compliance with the Student Transfer Achievement Reform Act {Senate Bill 1440, now codified in California Education Code sections 66746-66749} and guarantees admission to a California State University (CSU) campus for any community college student who completes an "associate degree for transfer," a newly established variation of the associate degrees traditionally offered at a California community college. Upon completion of the transfer associate degree, the student is eligible for transfer with junior standing into the California State University (CSU) system. Students will be given priority consideration when applying to a particular program that is similar to the student's community college area of emphasis. Visit www.sb1440.org for the latest information about these degrees.

NOTE: Program first offered Fall 2012
