2.4 Supplemental Information re. Proposed Classified Personnel Salary Schedules for 1960-1961: The Superintendent wishes to point out that the proposed salary schedules for classified personnel do not represent the salary increases recommended by the Classified Personnel Services of the California State Personnel Board; the salary increases requested by the Salary Committee of the local C.S.E.A. Chapter; or the wishes of the administration.

Salary schedules for classified personnel for 1959-1960 were not increased in the spring of 1959 because of the expectation that any salary adjustments resulting from the State’s comprehensive survey would be effected as of January 1, 1960. The time necessary to complete the survey and the defeat of the tax rate proposal in February necessitated a change in thinking on this point, with the result that salaries of classified personnel were not increased for the current school year.

It was the recommendation of the Classified Personnel Survey, which conducted the survey upon which the proposed salary schedule is based, that each step of the salary schedule be increased 3% to reflect the increase in the community salary level since last fall.

The C.S.E.A. Salary Committee requested consideration of a 5% increase in addition to the 3% increase recommended by the Classified Personnel Services.

The administration is of the opinion that the 3% adjustment recommended by the California State Personnel Board is justifiable, but this increase cannot be financed with anticipated revenues for next year.

2.6 Teachers' Salaries for 1960-1961: On April 7, 1960, the Finance and Research Committee of the Santa Barbara City Teachers' Club requested the Board's consideration of a proposed salary schedule for 1960-1961 which provides a minimum salary of $4900. (present minimum, $4600.), and a maximum salary of $8700. (present maximum, $8200.). This request was referred to the administration for further study in connection with budget planning for next year.

The administration has carefully studied the proposed schedule in the light of financial restrictions, and has come to the conclusion that it cannot be financed for next year with anticipated revenues. It is estimated that the net cost of financing the proposed schedule would be $125,000. in the Elementary District, and $200,000. in the High School District.

Since the present school term closes Friday, June 17, the Superintendent suggests that the Board make some definite statement regarding teachers' salaries for next year in order that this information may be relayed to members of the teaching staff. It is also necessary for the administration to know how to proceed on teachers' contracts for next year.
