STATEMENT OF INTENT RE. BOND BUILDING PROGRAMS

Upon passage of the bond issues called for at the special election on March 27, 1962, the Board of Education of the Santa Barbara School District and Santa Barbara High School District intends to spend the money as recommended by the Citizens' Advisory Committee, the PTA Study Committee, and the PTA Council insofar as the available bond funds will permit.

Architects have already been appointed to plan the following emergency projects for the most urgent enrollment increases:

- A new junior high school in the Goleta Valley for a capacity of approximately 1200 students;
- Classroom additions at San Marcos High School to accommodate 600 - 700 additional students;
- Classrooms and other student facilities at Santa Barbara City College as the first phase in development of a master plan which will ultimately increase the capacity to approximately 2500 students.

Immediately after a successful election on March 27, the Board of Education will appoint architects to begin work on other projects recommended by the CAC and PTA. Bids will be called for and construction started on these projects upon completion of the necessary plans and their approval by the State Division of Architecture. Insofar as possible, all major projects will be carried on concurrently.

The other major projects for which architects will be appointed this spring include:

Santa Barbara High School District

Santa Barbara High School: New library and instructional aids facility; new cafeteria; conversion of present cafeteria and library space to additional classrooms; improvements to auditorium, industrial arts building, girls' gymnasium

La Cumbre Junior High School: Completion of rehabilitation and modernization of main building; cafeteria improvements; physical education facilities room

Santa Barbara Junior High School: Multi-use room for cafeteria and physical education; conversion of present cafeteria to music laboratories

La Colina Junior High School: Auditorium (multi-use facility)
10 portable classrooms

Administration Center: Development of adequate administration center on new site

Santa Barbara (Elementary) School District

Cleveland School: Multi-use room and administration offices

Wilson School: Multi-use room and alterations to main building

Mesa Schools (Washington and/or Monroe): Additional classrooms

Special Education: New building for orthopedically handicapped students

Other recommendations of the Citizens' Advisory Committee and the PTA include the purchase of sites for future elementary and secondary schools which will be needed, and a number of improvements to existing facilities which do not require professional services of an architect. Preliminary steps have already been taken with reference to several specific school sites for future schools. The other recommendations will be completed in conjunction with the proposed bond fund program.
