4.7 Improvements on Hollister Avenue: For some time the Board has been aware of the drainage ditch problem on Hollister Avenue in front of San Marcos High School, and master plans to widen Hollister Avenue. The Business Division has been working with the County Road Department on general planning for these improvements, and definite plans were completed just this week. The plans call for widening the road, installing sidewalks, curbs, and gutters, and replacing the open drainage channel with a covered, concrete channel. The plan also provides that Santa Barbara County will let the contract for the entire job, and that the Santa Barbara High School District will reimburse the County for the District's fair share of the cost. It is estimated that our proportionate cost will be approximately $25,000.

The Superintendent recommends that Mr. Browne be authorized and directed to notify the County Road Department of the Board's intention to participate in this cooperative program, and authorize the County to proceed with the understanding that the District will reimburse the County with approximately $25,000, as the District's portion of the cost.
