STATEMENT OF PURPOSE

A fundamental assumption of this proposal is that students learn and retain more by participating actively in their own educational experience. Moreover, the study of international and comparative politics suggests unique opportunities for enrichment by increasing this level of participation. The proposal which follows seeks to maximize student involvement by providing (a) a well-equipped and well-staffed Area Studies Workshop, intended to create an environment conducive to the development of creative and original research projects, the results of which may be more effectively communicated through (b) a Media Workshop which will be tasked with providing a bridge between the professor's lecture and the student's comprehension. The pursuit of meaningful involvement, leading to increased levels of understanding and retention of both information and concepts, is the central purpose of this cooperative venture between the Political Science Departments of the University of California at Santa Barbara and Santa Barbara City College.

PETER HASLUND, Assistant Professor
Political Science
