Report on Instructional Re-organization

On May 6, 1976, a special validation team visited Santa Barbara City College in conjunction with the College's Institutional Self-Study for accreditation. The team recommended that, as a part of the next two annual reports, the Commission request progress statements on the progress of instructional re-organization. Reference is made to the last year's report in which the formation of a Cluster Leaders' Council is described.

At the time of last year's report, there was still doubt about the manner in which certain educational planning functions would be carried out. At that time, three half-time Teacher/Coordinators were functioning in the areas of Instructional Resources, Curriculum, and Professional Development.

During the summer of 1977, the Assistant Dean, Evening College and Summer Session, retired. This position was restructured to include most of the duties of the Teacher/Coordinator, Instructional Resources. At the same time, a new position was created — Assistant Dean, Educational Planning and Development. This position encompasses the duties of the other two Teacher/Coordinators.

These two positions were successfully filled prior to the opening of the Fall Semester, 1977, and at this writing it appears that the problems of instructional re-organization have been resolved in a very satisfactory manner, acceptable to all constituencies on the campus.
