NOTE TO PAGE 3, ITEM B.3.a.

It will be noted that the first year enrollment shown is significantly less than the 49 assured in the previous year's application. Since 1974, the Associate Degree Nursing Program at this college has been structured around 36 self-paced modules. Students move in and out of the program at all times of the year and the relative proportion of first- and second-year students fluctuates although the total normally stays relatively constant near the maximum capacity of 100. As the second-year students graduate, they are replaced with accepted applicants for the first year class who have been placed on a waiting list.

Thus, the relative proportions of first- and second-year students shown above applied to the specific October 15 date, but later in the term the number of first-year students met or exceeded the assured number of 49.
