PROPOSED GE PHILOSOPHY

The general education program at Santa Barbara City College outlines a core curriculum which provides an opportunity for students to explore elements of the intellectual and ethical traditions to which they belong. The faculty believes that this common core is of general and lasting intellectual significance and that it will establish a foundation for the lifelong process of intellectual inquiry and the integration of knowledge, skill, attitudes and experiences.

The general education program has several major objectives:

-- to cultivate the intellectual processes of learning and to examine methods for acquiring, integrating and applying knowledge.

-- to introduce students to the modes of thought characteristic of various intellectual disciplines

-- to help students understand the conditions and forces which shape their lives and thus help them to cope with a complex and changing world.

-- to explore elements of our common human nature and to assist students in applying critical and informed judgements to the cultural achievements of their own and other cultures.
