Engineering

Engineering involves the application of science, mathematics and technology to solve and analyze a wide range of problems. In today’s society, engineering specialties include civil, electrical, mechanical, chemical, materials, industrial, aeronautical, environmental and computer engineering, among others. In general, engineers participate in the activities which make the resources of nature available in a form beneficial to society and provide systems which will perform optimally and economically.

The Engineering transfer program at Santa Barbara City College provides lower-division engineering course work equivalent to the first two years of education at a 4-year university leading to a Bachelor of Science Degree. At Santa Barbara City College, all Engineering transfer students major in Engineering and do not declare a specific branch of engineering study until after they have transferred to a 4-year university. An Associate in Science and an Associate in Arts may also be obtained.

Department Offices
Mike Young, Chair (PS-119, ext. 2697)
Donald Ion, Supervising Lab Technician (PS-120, ext. 2312)

Faculty and Offices
Nick Arnold (PS-118, ext. 4253)
Jodi Simpson (PS-121, ext. 2505)

Degrees and Certificates Awarded
Associate in Arts and Associate in Science: Engineering

A.S./A.A. Degree Requirements: Engineering

Department Requirements (48-54 units)

- CHEM 155 — General Chemistry I .........................5
- ENGR 101 — Introduction to Engineering ..................2
- MATH 150 — Calculus with Analytic Geometry I .......5
- MATH 160 — Calculus with Analytic Geometry II .......5
- MATH 200 — Multivariable Calculus ......................4
- MATH 210 — Linear Algebra ....................................4
- PHYS 121 — Mechanics of Solids & Fluids ...............5
- PHYS 122 — Electricity & Magnetism ......................5

Plus one of the following courses is required:
- ENGR 115 — Statics & Strength of Materials or ........4
- ENGR 117 — Electronic Circuits and ....................3
- ENGR 117L — Electronic Circuits Laboratory ..........1

Plus at least 3 additional courses from the following list:
- CHEM 156 — General Chemistry II .........................5
- CS 119 — FORTRAN Programming .......................3
- CS 131 — Assembly Language Programming ............4
- CS 135 — Programming Fundamentals ....................3
- CS 137 — C Programming ..................................3
- ENGR 105/DRFT 105 — Engineering Graphics .............4
- ENGR 115 — Statics & Strength of Materials ..............4
- ENGR 116 — Dynamics .......................................4
- ENGR 117 — Electronic Circuits and ...................3
- ENGR 117L — Electronic Circuits Laboratory ..........1
- DRFT 130/ENGR 130 — CAD Design I .....................5
- MATH 220 — Differential Equations ......................4
- PHYS 123 — Heat, Light & Modern Physics ..............5

Note: A course may not be used to satisfy more than one requirement. (double counting is not allowed.)

College Requirements

For complete information, see “Graduation Requirements” in the Catalog Index.
Planning a Program of Study

Students should work with Santa Barbara City College’s counseling staff in planning semester-by-semester programs of study. Important conditions to be met by students majoring in the Physical Sciences include:

1. The number of units taken each semester is a matter of personal choice. Students who work full-time should take a reduced course load.

2. Many required courses are in sequences—which must be taken in the prescribed order (e.g., MATH 150, 160, 200/210, and 220).

3. Some courses are prerequisites for courses in the sequences (e.g., MATH 150 is a prerequisite for Physics 121). Some sequences are especially important for the sciences. The sciences do require reading, writing and mathematical skills. Science textbooks are typically at a grade 13-14 reading level. Students deficient in such skills have a unique opportunity at Santa Barbara City College to quickly and efficiently reach the levels required in the majors programs through the following sequences:

   **English Sequence**
   1. Passing score on placement exam (to) ENG 110 (to) ENG 111; or
   2. English Skills (to) ENG 100 (to) ENG 110 (to) ENG 111

   **Mathematics Sequence**
   1. MATH 100 (to) MATH 111 (to) MATH 137 (to) MATH 138 (to) 150, 160, 200, 210, 220; or
   2. High school algebra and trigonometry, plus passing score on placement exam (to) MATH 150, 160, 200, 210, 220

   Special Note: If you have not been tested for appropriate course placement in respect to the aforementioned sequences, contact the Counseling Center for up-to-date pre-enrollment testing schedule information. You should make sure that you have the necessary skills for each class taken—in order to succeed and/or progress in your chosen major.

Other important sequences include:

**Chemistry Sequence**
CHEM 101 or high school chemistry (to) 155 (to) 156.

**Physics Sequence**
PHYS 102 or high school physics (to) 121 (to) 122 (or) 123.

**Engineering Sequence**
Most Engineering courses may be taken in any order. However, many Engineering courses have Physics and Mathematics prerequisites and Corequisites. Students are encouraged to contact a counselor or faculty adviser for preferred sequences.

**Preparation for Transfer**
Course requirements for transfer vary depending upon the college or university a student wishes to attend. Therefore it is most important for a student to consult with his/her counselor and departmental adviser before planning an academic program for transfer.

**Honors and Awards**
The Physics and Engineering Departments select one student each year in each department as an Outstanding Student. Selections are made by faculty in the department areas involved. Selections are based solely on academic excellence and no applications by students are required.

**Course Descriptions**

**ENGR 100 /HIST 150 — Technology and Society**
(3) F, S — CSU, UC*
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Survey of the history of technology, from antiquity to the 20th century, stressing the role of technology as a major determinant in the development of Western civilization. Emphasis on technology’s changing impact upon society. (*UC Transfer Limit: ENGR100/HIST 150 and HIST 151, 152 combined: maximum credit, 6 units).
