Biological Sciences
The Biological Sciences curriculum provides the foundation for our majors: Biological Sciences, Bio-Medical Sciences and Natural History. Our two-year Associate in Arts Degrees are designed to provide the knowledge and skills for success before and after transfer to a four-year institution. Students who complete specialized one-year programs of study in Bio-Medical Sciences, Marine Science and Natural History can earn Biological Sciences Departmental Awards.

Our Biological Sciences Associate in Arts Degree provides preparation for transfer in such areas as Biochemistry, Molecular Biology, Pharmacology, Cell Biology, Ecology, Marine Biology, Botany, Zoology, Medical Technology and Pre-Medicine.

The Bio-Medical Sciences Emphasis: Associate in Arts Degree in Liberal Arts provides a strong foundation for students interested in pursuing a career in the health sciences.

The Natural History Associate in Arts Degree provides preparation for transfer in such areas as Natural History, Freshwater and Marine Fisheries and Wildlife Management. The Natural History A.A. can be completed fully online.

We offer specialized and general courses for all students, and support courses for medical technology and health services; recreation and nature interpretation; environmental studies; marine diving technology; and sports medicine. Many courses of a more general nature allow students to fulfill General Education and graduation requirements in Natural Sciences, while developing a biological perspective.

Our courses take advantage of the newest technology for delivery of information to students, while retaining the tradition of personalized instruction and small class sizes. Computers at every lab bench, a 30-station computer classroom and a seamless network with wireless access facilitates student learning through the use of computer tools and information from any Biological Sciences classroom, laboratory and tutor room.

Online instruction carries this concept off campus to our students in Santa Barbara and worldwide, through more than 11 fully online classes. The excitement of beginning a path to a meaningful profession in biology is enhanced by a completely integrated system for acquiring information from instructors who love biology and teaching.

Advances in biological knowledge are providing solutions to the most challenging problems in medicine, environmental resources, agriculture and human ecology. Employment opportunities continue to increase as knowledge grows in genetic engineering, embryonic development, learning and memory, aging, environmental studies, natural resource management and the regulation of populations.

Department Student Learning Outcomes
1. Articulate the principles of evolutionary theory, the history of its development, and the role that evolution plays in the continuity and diversity of life.

2. Communicate the unifying principles governing the organization of organisms, from molecules to populations.

3. Explain and apply fundamental ecological principles, from populations to communities through ecosystems, and the geographical distribution of life on Earth.

4. Summarize and illustrate an understanding of the development of the organism, from fertilization to the adult form.

5. Compare and contrast organismal diversity and life histories, including nomenclature, taxonomy and systematics.

6. Characterize fundamental metabolic pathways, describe bioenergetics, and relate the interdependence of these pathways.

7. Demonstrate understanding of the structure and function of tissues, organs and organ systems, describing interrelationships and mechanisms of their integration to support the whole, functioning organism and the underlying causes of dysfunction.

8. Describe and connect the role of DNA in regulating cell activity to its importance as the basis of inheritance, evolution and biotechnology.

9. Demonstrate proficiency in the basic methods, instrumentation and quantitative analytical skills used to conduct biological research, including fundamental methods of microscopy, animal and plant dissection, and molecular and cellular biology.

10. Produce original research reports and review papers in a standard scientific format based
on laboratory, field experiments and literature searches that include critical quantitative and qualitative evaluation of data to effectively communicate results, interpretations and concepts.

Department Offices
Blakely R. Barron, Chair (EBS-322, ext. 2444)
Susan Williams, Division Aide (EBS-213, ext. 2393)
Eric Wise and Blakely Barron, Faculty Advisers, Biological Sciences
Larry Jon Friesen, Faculty Adviser, Natural History
Heather J. Rose, Faculty Adviser, Bio-Medical Sciences
Adam Green, Faculty Adviser, Environmental Studies
Chelsea O’Connell, Teachers’ Aide (EBS-212, ext. 2311)
Paula Coffey, Senior Lab Tech. (EBS-218, ext. 2838)
Brett Leigh Dicks, Senior Lab Tech. (EBS-333, ext. 2319)
Samuel Hammond, Senior Lab Tech. (EBS-218, ext. 2327)
Joe Rivas, Instructional Computer Lab Coordinator (EBS-216, ext. 3499)

Faculty and Offices
Peter Aguilar (EBS-308, ext. 2515)
Blakely R. Barron (EBS-322, ext. 2444)
James P. Doohan (EBS-314, ext. 2330)
Larry Jon Friesen (EBS-324, ext. 2318)
Adam Green (EBS-323, ext. 2394)
Jennifer L. Maupin (EBS-321 ext. 2396)
Michelle Paddack (EBS-319 ext. 2328)
Heather J. Rose (EBS-320, ext. 2329)
Barry Tanowitz (EBS-306, ext. 2778)
Eric Wise (EBS-305, ext. 2517)

Degrees Awarded
Biological Sciences: Associate in Arts
Liberal Arts: Emphasis in Biomedical Sciences: Associate in Arts
Natural History: Associate in Arts

Departmental Awards
Bio-Medical Sciences: Departmental Award
Marine Science: Departmental Award
Natural History: Departmental Award

Honors Certificate of Achievement: Sciences
See “Honors Program” in the Catalog Index.

Planning a Program of Study for Transfer
Special problems confront the student planning to transfer to a four-year college or university. Both General Education and major requirements differ from one institution to another and within a single institution by major emphasis. These differences, plus personal, educational and professional goals, employment and prior preparation, will influence the courses you take. You should work closely with one of the Biological Sciences Faculty Advisers, Eric Wise (EBS-305, ext. 2517) and Blakely Barron (EBS-322, ext. 2444), to plan your program of study at SBCC.

General Education. It is very important for biology majors to complete the preparation in the major even if it means delaying some General Education/IGETC requirements. The science curriculum is sequential, controlled by prerequisites; you do not want to be in the position of taking freshman science classes as a junior.

Preparation in the Major. Since biology courses are built upon a base of mathematics and the physical sciences, it is important for biology students to begin these courses early so that they may be completed before transfer. The areas of highest concern are Mathematics, Chemistry, Physics and preparation in Biology. Students who must make up deficiencies should do so as early as possible.

Mathematics. Statistics is more widely applicable in biology than is calculus, yet most institutions require calculus because of its utility in rate-oriented biology. You should attempt to complete Elementary Statistics (MATH 117) and a calculus sequence (MATH 130-131 or 150-160) prior to transfer. If you are not eligible for these courses based on your placement exam scores, immediately enter the mathematics sequence at the recommended course level.

Chemistry. It is difficult to understand modern biology without at least an introduction to organic chemistry. Students without prior chemistry background and/or mathematics deficiencies may need to take CHEM 101 and appropriate mathematics courses before beginning the General and Organic Chemistry sequence (CHEM 155, 156, 211-221, 212-222). Note, however, that some universities require
upper division organic chemistry. If so, complete organic chemistry after transfer.

*Physics.* There are three physics sequences for biology majors. General Physics (PHYS 105-106) requires algebra and trigonometry. PHYS 110-111 and PHYS 121-122-123 require calculus. Again, colleges and universities differ as to their physics requirements. Many require calculus-based physics.

**Biology.** SBCC has one of the strongest programs for preparation in three biology majors: Biological Sciences, Bio-Medical Sciences, and Natural History. In addition to the biology major core sequence, BIOL 101-Plant, 102-Animal, 103-Cell, 104-Molecular and 105-Molecular Laboratory, biology students may choose from a wide range of courses to add depth and diversity to match their goals and interests. Four-year colleges and universities have different core sequences; to assure compatibility of your course selection and transfer institutions, contact the Counseling Center (Student Services, Room 120).

### Declaring a Biology Major

If you have decided to major in biology, or you are not sure but are strongly considering it, *declare a biology major.* Declaring your major protects you from changes of departmental requirements. You will be able to follow either the rules in effect at the time you declared your major, or the rules as later changed. Further, by declaring a biology major you meet one of the requirements for scholarships offered by the Biological Sciences Department.

You may declare a biology major at the time you register at SBCC. Any time thereafter, you may declare a biology major or change your major by filing a “Change of Major” form at the Office of Admissions and Records or online through Pipeline.

### Associate in Arts Degree: Biological Sciences

The Biological Sciences major is designed to provide a strong foundation for students interested in life’s structures and functions from perspectives of molecules and cells, organisms and populations, and ecology and evolution.

### Department Requirements (29.5 units)

<table>

*Biol 105, Molecular Biology Laboratory, strongly recommended.

### Recommended for Transfer

These additional courses should be considered when planning a program of study for transfer as a biology major.

- BIOL 105 — Molecular Biology Laboratory
- CHEM 211-221 — Organic Chemistry I & Lab
- CHEM 212-222 — Organic Chemistry II & Lab
- MATH 117 — Elementary Statistics or
  - MATH 117H — Elementary Statistics, Honors
- MATH 130-131 — Calculus for Biological Sciences, Social Sciences & Business I & II or
  - MATH 150-160 — Calculus with Analytic Geometry I & II
- PHYS 105-106 — General Physics or
  - PHYS 110-111 — Introductory Physics or
  - PHYS 121-122-123 — Calculus-Based Physics

### Biological Sciences Sample Program

The following sample program will satisfy department and college requirements for graduation with an A.A. Degree and includes additional recommended courses to meet department requirements of most four-year colleges and universities.
**First Year**

*Fall Semester*  
Biology 101  
Chemistry 155  
Mathematics 130 or 150*  
English 110 or 110H  
Physical Education  

*Spring Semester*  
Biology 102  
Chemistry 156  
Mathematics 131 or 160*  
English 111 or 111H  

*Second Year*  

*Fall Semester*  
Biology 103  
Chemistry 211-221*  
Physics 110*  
Geography 102  
Physical Education  

*Spring Semester*  
Biology 104  
Biology 105*  
Chemistry 212-222*  
Physics 111*  
Poli. Science 101  

*Recommended for students planning to transfer.*

**Associate in Arts Degree: Natural History**

The Natural History major is designed to provide a broad survey of the diversity of Earth's life forms and their evolutionary and environmental relationships. By carefully choosing electives, a student may emphasize specialized areas for transfer, including aquatic biology, zoology, botany and environmental biology.

**Department Requirements (29-30 units)**

- BIOL 110 — Natural Science or BIOL 110H — Natural Science, Honors or BIOL 120 — Natural History or BIOL 140 — Principles of Biology 3 – 4
- BIOL 112 — Evolution and Adaptation or BIOL 150 — Biodiversity 3
- BIOL 122 — Ecology 3
- BIOL 123 — Ecology Laboratory 1
- BIOL 144 — Biogeography or ERTH 141/GEOG 101 — Physical Geography 3
- BOT 121 — Plant Diversity 4
- ZOOL 122 — Animal Diversity 3
- Natural History electives* 9

*In addition, 9 units of elective credit, selected in consultation with the Natural History Faculty Adviser, are required to complete the major field requirements.

**Selection of Natural History Electives**

Students may choose Natural History elective courses from the areas of Anthropology, Art, Biology, Bio-Medical Sciences, Botany, Chemistry, Earth and Planetary Sciences (Geology), Environmental Studies, Mathematics, Physics and Zoology. Students intending to transfer with an A.A. Degree in Natural History should include introductory courses in general and organic chemistry, physics and statistics. *Natural History electives must be selected in consultation with the Natural History Adviser and should be made carefully to avoid problems with departmental approval and transfer.*

**Natural History Sample Transfer Program**

The following sample program illustrates a course sequence that emphasizes general Natural History. This program will satisfy department and college requirements for graduation with an A.A. Degree and includes elective courses to meet departmental requirements of many four-year colleges and universities.

**First Year**

*Fall Semester*  
Biology 122¹ + 123¹  
Biology 144¹  
Chemistry 155²  
English 110¹  

*Spring Semester*  
Biology 120¹  
Zoology 122¹ + 123²  
Chemistry 156²  
English 111¹

**Second Year**

*Fall Semester*  
Biology 112  
Biology 142¹  
Mathematics 117¹  
Political Science 101¹  

*Spring Semester*  
Biology 121¹  
Botany 121¹  
Zoology 137¹  
Art 215¹  
Communication 121¹

¹ Available online

² Natural History Electives must be selected in consultation with the Natural History Faculty Adviser.
### Associate in Arts Degree in Liberal Arts: Emphasis in Bio-Medical Sciences

#### Department Requirements (30-31 units)

<table>

<td>General Chemistry I</td>
<td>5</td>
</tr>
</tbody>
</table>

Plus 13 units of Bio-Medical Sciences electives selected from the following. Bio-Medical Sciences electives should be carefully selected in consultation with the Bio-Medical Sciences Faculty Adviser or the Sciences Counselor to avoid problems with transfer. Students intending to transfer with an A.A. Degree in Liberal Arts: Emphasis in Bio-Medical Sciences should include introductory courses in general and organic chemistry, physics and statistics.

#### Natural History

Natural History Electives* .........................................................9
1 Biology 101 — Plant Biology (5) may substitute for Botany 121
2 Biology 102 — Animal Biology (5) may substitute for Zoology 122 + 123
3 Zoology 123 — Animal Diversity Lab recommended

*In addition, 9 units of elective credit, selected in consultation with the Natural History Faculty Adviser, are required to complete the major field requirements.

A student must complete each of the courses required with a grade of “C” or better.

**Marine Science**

The Marine Science Departmental Award comprises 21 units and signifies that students have a broad background in the physical and biological processes of the world’s oceans and the tools and techniques with which they are studied. The curriculum includes courses from Biology, Marine Technology and Earth and Planetary Sciences, and is especially suited to students interested in the fields of mariculture, boating and recreation, skin and Scuba diving, fishing, scientific research and marine science.

Students interested in a Marine Biology major should take the Biological Sciences majors sequence. You are encouraged to supplement this sequence with courses in Marine Science.

**Marine Science Required Courses (21 units)**

Students planning on completing the Marine Science curriculum in two semesters can begin in either Fall or Spring.

**Fall Semester**

BIOL 124* — Biological Oceanography ...........................................4
ERTH 152 — Weather and Climate or
GEOR 152 — Weather and Climate ...........................................3
MDT 108 — Rigging .................................................................1.6
MDT 109 — Seamanship and Small Boat Handling ...............2.1
HE 103* — Responding to Medical Emergencies ..........2

**Spring Semester**

BIOL 125* — Marine Biology .....................................................4
MDT 101 — Information and Introduction to Marine Diving Technology ........................................0.3
ERTH 151/151L — Introductory Physical Oceanography and Lab ..................................................4

*Substitutions: The combination of BIOL 101 (Plant Biology) and BIOL 102 (Animal Biology) can be substituted for BIOL 125. The completion of EMT 110 can be substituted for HE 103. The completion of BIOL 142 can be substituted for BIOL 124.

A student must complete each of the required courses (or use substitution options) with a grade of “C” or better.

**Advising**

Students pursuing Departmental Awards are encouraged to identify themselves to the appropriate adviser to formulate a program of study.

Bio-Medical Sciences: Heather J. Rose
Environmental Studies: Adam Green
Marine Science: Michelle Paddock
Natural History: Larry Jon Friesen

**Honors and Awards**

**Outstanding Student Awards**

Each year one student may be selected “Outstanding Student” in Biology, Bio-Medical Sciences, Botany, Cell, Molecular, Natural History, Marine Science and Zoology. Selections are made by the Biological Sciences Department faculty. Selections are based solely on academic excellence and applications by students are not required.

**Robert J. Profant Memorial Scholarship**

Established in 1991 in honor of the late Professor Profant’s long and dedicated career, and awarded once each year, the Robert J. Profant Scholarship recognizes an outstanding student majoring in biology. Students are recommended to the department by faculty or may apply through the Financial Aid Office.

To qualify for a scholarship award, a student must be a declared biology major (Biological Sciences or Natural History), enrolled in a course offered by the
Biological Sciences Department during the academic year of application, and have a 3.5 GPA in courses from the sciences and mathematics.

William Olivarius Scholarships

In 1982, a generous endowment from the late William Olivarius enabled the Biological Sciences Department to offer scholarships to students majoring in biology. Several scholarships of $500 are awarded each year on the basis of academic excellence.

To qualify for a scholarship award, a student must be a declared biology major (Biological Sciences, Biotechnology or Natural History), be enrolled in a minimum of 12 units each semester of the award year, and have a minimum overall grade point average of 3.0. All students with exceptional overall GPAs are encouraged to apply.

Scholarship applications are available from the Biological Sciences Department Office. Applications and faculty nominations are due at the end of the first week of February.

Richard Armstrong Memorial Scholarship

Richard Armstrong is warmly remembered as a dedicated scientist and SBCC professor who taught in the Biological Sciences Department for three decades. He passed away in the Spring 2005 semester and is honored by his family, friends and colleagues with this scholarship.

Eligible students must demonstrate academic excellence and a passion for biology. They must have declared a major in one of the Biological Sciences and have completed at least 12 units of the biology majors sequence of courses, preferably (but not limited to) the following courses: Biology 101, 102, 103, and 104 and Chemistry 155, 156. They may be either continuing their studies at SBCC (with a clear intent of pursuing an advanced degree) or transferring to a 4-year institution as a biology major.

Joe W. Dobbs, O.D., Scholarship Fund

Joe W. Dobbs, O.D., a dedicated supporter and former Santa Barbara City College trustee, established this fund to support and encourage motivated students in Biological Sciences. These scholarships are available to students majoring in any area of Biological Sciences.

Established in 2004, Joe W. Dobbs Scholarships are awarded as book grants, scholarships and internships to students carrying twelve (12) or more units each semester, with a minimum overall GPA of 2.5. Awards of the scholarships, grants or internships are based on academic achievement, with preference given to highly motivated, enthusiastic scholars showing the greatest potential for success in their chosen area of study. Awards are made at the beginning of Fall and Spring semesters, in amounts of $100 (min.) books, $1,000 (min.) grants and $2,500 (min.) internships.

The deadlines for faculty nominations and student applications are August 15 (Fall awards) and December 15 (Spring awards).

Microbiology Achievement Award

The Microbiology Achievement Award is an endowed gift administered jointly by the Biological Sciences Department and the Foundation for Santa Barbara City College. The Award is meant as a special recognition to the student who demonstrated superior academic achievement in the field of microbiology, as well as in true academic tradition, exhibited outstanding class leadership and provided strong support to classmates.

David W. Doner, Jr., M.D. Scholarship

This award is made possible by the generous gift of David W. Doner, Jr., M.D. Dr. Doner practiced medicine for forty years and taught medical residents and students at Boston University, Tufts University, and Santa Barbara Cottage Hospital as an active faculty mentor. He endowed a scholarship fund for the Biological Sciences Department and the School of Nursing at Santa Barbara City College, specifically for pre-medical science and allied health majors.

Special Programs and Courses

291 — Seminars in the Biological Sciences

The 291 series in Biological Sciences is designed to provide students the opportunity to investigate areas outside the regular course offerings. The topics are selected on the basis of faculty and student interest. Students are urged to suggest topics to the department.
295/298/299 — Internship and Independent Studies

This series offers opportunities to students with particular skills or interests to receive credit for internship (295), independent reading (298) or research (299). You may enroll in Internship and Independent Studies at any time during the semester. You must secure a faculty sponsor and file an Independent Studies proposal with the Biological Sciences Office and the Office of Admissions.

Student Employment Opportunities

Each semester the Biological Sciences Department hires students as laboratory and museum assistants, collectors, tutors and readers. Students may apply for one of these positions at the Biological Sciences Offices (EBS-212). The greatest number of positions is available at the beginning of the school year. Students are encouraged to file an application during the prior spring semester or during the summer to have the best chance for employment beginning in the fall.

Student laboratory and museum assistants gain experience in laboratory and museum techniques under the supervision of Biological Sciences faculty and laboratory technicians. Museum assistants and collectors collect, accession and preserve botanical and animal specimens for use in classes and work on a variety of departmental projects.

Students who have performed well in a course and who demonstrate interest and ability in teaching are selected by the faculty as readers or to tutor students currently enrolled in the course. The purpose of this program is twofold: Current students in the course receive excellent peer tutoring; and tutors learn the techniques of teaching. Tutors also find that to teach is to learn.

Course Descriptions

Anthropology

ANTH 101 — Physical Anthropology
(3) — CSU, UC
Skills Advisories: Eligibility for ENG 110 or ENG 110H.
Hours: 54 lecture

Biological aspects of human characteristics and behavior; the relationship of humans to other animals; the origins and evolutionary adaptations of human populations and the biological basis for the diversity of human groups.

Biology

BIOL 100 — Concepts of Biology
(4) — CSU, UC*
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 108 (54 lecture, 54 lab)

Basic concepts of biology. Designed for non-biological sciences majors with no prior general biology course. Satisfies SBCC General Education requirement in Natural Sciences. (*UC Transfer Limit: no credit for BIOL 100 if taken after BIOL 101, 102 or 103)

BIOL 101 — Plant Biology
(5) — CSU, UC
Prerequisites: MATH 107 or MATH 111
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Course Advisories: BIOL 101
Hours: 162 (54 lecture, 108 lab)

Principles of biology, with emphasis on major plant groups. Anatomy, physiology, evolution and diversity of the Monera, Protoctista, Fungi and Plantae. Required for the Biological Sciences major. Satisfies SBCC General Education requirement in Natural Sciences.

BIOL 102 — Animal Biology
(5) — CSU, UC
Prerequisites: MATH 107 or MATH 111
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Course Advisories: BIOL 101
Hours: 162 (54 lecture, 108 lab)

Principles of animal taxonomy, evolution, population and community ecology; protist and animal diversity and adaptations; emphasis on vertebrate anatomy and physiology. Required for the Biological Sciences major. Satisfies SBCC General Education requirement in Natural Sciences.

BIOL 103 — Cell Biology
(5.5) — CSU, UC*
Prerequisites: MATH 107 or MATH 111 and CHEM 104 or CHEM 155 and ENG 110 or ENG 110H
Hours: 153 (54 lecture, 18 discussion, 81 lab)

Cell structure and function: molecular architecture, reproduction and growth; elementary mechanisms of
genetics; intercellular communication and behavior; cell and organ system physiology; life’s origin. Study of the scientific literature with instruction in critical thinking, composition and logical analyses of ideas and experimental results. Required for the Biological Sciences and Biotechnology majors. Satisfies SBCC General Education requirement in Communication and Analytical Thinking. (*UC Transfer Limit: BIOL 103 maximum credit, 5 units)

**BIOL 104 — Molecular Biology**  
(4) — CSU, UC*  
*Prerequisites: MATH 107 or MATH 111  
Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Course Advisories: CHEM 155 and CHEM 156  
Hours: 54 lecture, 18 discussion  
Molecular cell biology and genetics of prokaryotes and eukaryotes; emphasis on transmission and molecular biology of genes. Required for the Biological Sciences and Biotechnology majors.  
(*UC Transfer Limit: BIOL 104 and 105 combined: maximum credit, 5 units)

**BIOL 105 — Molecular Biology Laboratory**  
(2) — CSU, UC*  
*Prerequisites: MATH 107 or MATH 111  
Corequisites: BIOL 104  
Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Hours: 72 (18 discussion, 54 lab)  
Laboratory in molecular cell biology and genetics of prokaryotes and eukaryotes; emphasis on transmission and molecular biology of genes. Strongly recommended for the Biological Sciences major; required for Biotechnology majors.  
(*UC Transfer Limit: BIOL 104 and 105 combined: maximum credit, 5 units)

**BIOL 106 — Biology of Research Organisms**  
(5) — CSU  
*Prerequisites: MATH 107 or MATH 111  
Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Hours: 126 (72 lecture, 54 lab)  
Biology, life histories and diversity of research organisms and tissues. Culture and maintenance of bacteria, fungi, protocists, and plant and animal tissues. Required for the Biotechnology major.

**BIOL 110 — Natural Science**  
(3) — CSU, UC*  
*Skills Advisories: Eligibility for ENG 110 or ENG 110H.  
Hours: 54 lecture  
Introduction to the physical and chemical principles important to an understanding of biological systems. Forces, matter and light; molecular structure and biochemical reactions; origin of life; bioenergetics; nerve and muscle; biological architecture; modes of locomotion; hearing and vision. In combination with BIOL 111, BIOL 110 satisfies General Education requirement in Natural Sciences.  
(*UC Transfer Limit: BIOL 110 and 110H combined: maximum credit, one course)

**BIOL 110H — Natural Science, Honors**  
(4) — CSU, UC*  
*Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Limitation on Enrollment: Acceptance into the Honors Program. See “Honors Program” section of this Catalog.  
Hours: 72 lecture  
Introduction to the physical and chemical principles important to an understanding of biological architecture and function. Laboratory and field investigations of forces, light and biomaterial; optimal form; bioenergetics; functional design. Satisfies SBCC General Education requirement in Natural Sciences.  
(*UC Transfer Limit: BIOL 110 and 110H combined: maximum credit, one course)

**BIOL 111 — Natural Science Laboratory**  
(1) — CSU, UC  
*Corequisites: BIOL 110  
Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Hours: 54 lab  
Laboratory and field investigations of forces, light and biomaterials; optimal form; bioenergetics; functional design. In combination with BIOL 110, 111 satisfies General Education requirement in Natural Sciences.

**BIOL 112 — Evolution and Adaptation**  
(3) — CSU, UC  
*Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Hours: 54 lecture  
Principles of biological evolution, diversity of life on Earth, and a survey of living and extinct organisms. Investigates theories of life’s origin, modes of
speciation and adaptations of dominant life forms through the ages. In combination with BIOL 141, BIOL 112 satisfies General Education requirement in Natural Sciences.

BIOL 116 — Biological Illustration
(4) — CSU
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Course Advisories: ART 120
Hours: 108 (54 lecture, 54 lab)
Traditional and contemporary techniques of scientific illustration of biological subjects for technical and medical print and electronic publications. May be taken four times for credit.

BIOL 118 — Nature Photography
(3) — CSU
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 90 (36 lecture, 54 lab)
Field and laboratory photography of biological subjects. Camera, light and film, and the special methods of wildlife photography, photomacrography, photomicrography and converting images to digital formats. May be taken four times for credit.

BIOL 120 — Natural History
(4) — CSU, UC
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 108 (54 lecture, 54 lab)
Survey of the natural environment through studies of Earth’s ecosystems: emphasis on the plant and animal inhabitants and the influences of cosmic, geological and meteorological phenomena. Satisfies SBCC General Education requirement in Natural Sciences.

BIOL 122 — Ecology
(3) — CSU, UC
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 54 lecture
Organisms and populations as integrated elements of communities and ecosystems. Population structure, growth and evolution; relationships between species: competition, predation, coevolution; community structure and development; biodiversity; biogeography. Satisfies SBCC General Education Requirement in Natural Sciences when combined with BIOL 123.

BIOL 123 — Ecology Laboratory
(1) — CSU, UC
Corequisites: BIOL 122
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 54 lab
Laboratory and field investigations of ecological principles. Satisfies SBCC General Education Requirement in Natural Sciences when combined with BIOL 122.

BIOL 124 — Biological Oceanography
(4) — CSU, UC*
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 108 (54 lecture, 54 lab)
Relationships between marine plants and animals and physical characteristics of Earth’s oceans. Emphasis on forms of marine organisms found in the open sea, their characteristics and ecological relationships. Biological sampling techniques and physical measurements studied in laboratory and at sea. Satisfies SBCC General Education requirement in Natural Sciences. (*UC Transfer Limit: BIOL 124 combined with ERTH 151: maximum credit, one course)

BIOL 125 — Marine Biology
(4) — CSU, UC*
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 108 (54 lecture, 54 lab)
Marine plants and animals, with emphasis on local organisms and their ecological adaptations. Laboratory covers particular habitats in the littoral zone during low tides. Satisfies SBCC General Education requirement in Natural Sciences. (*UC Transfer Limit: BIOL 125 and 126 combined: maximum credit, one course)

BIOL 126 — Freshwater Biology
(4) — CSU, UC*
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 108 (54 lecture, 54 lab)
Diversity of plants and animals associated with marshes, ponds, lakes and streams; ecological relationships and adaptations to life in water. Field studies emphasized. Satisfies SBCC General Education requirement in Natural Sciences. (*UC Transfer Limit: BIOL 125 and 126 combined: maximum credit, one course)
BIOL 130 — Methods in Field Biology  
(3) — CSU  
Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Hours: 80 (32 lecture, 48 lab)  
Nature photography, photomicroscopy, illustration and data collection to record events in nature. Students participate in research projects, maintain a field notebook/journal and produce a research report displaying the results of techniques learned over the semester. May be taken four times for credit.

BIOL 133 — Ecology of Morro Bay Area  
(1) — CSU  
Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Hours: 32 (8 lecture, 24 lab)  
Field course of study introducing the ecology of the relatively undisturbed wetland habitats of the Morro Bay region of the central California coast (mudflats, salt marsh, rocky outer coast).

BIOL 140 — Principles of Biology  
(3) — CSU, UC*  
Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Hours: 54 lecture  
Basic principles of biology. Designed for non-Biological Sciences majors. Not open to students who have completed BIOL 100. (*UC Transfer Limit: no credit for BIOL 140 if taken after 100, 101, 102 or 103)

BIOL 141 — Biology Laboratory  
(2) — CSU, UC*  
Corequisites: BIOL 140 or BIOL 112  
Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Course Advisories: High school biology  
Hours: 72 (18 lecture, 54 lab)  
Laboratory investigation of biological principles and techniques of investigation. Satisfies SBCC General Education requirement in Natural Sciences when combined with BIOL 140 or BIOL 112. (*UC Transfer Limit: no credit for BIOL 141 unless taken after or concurrently with BIOL 112 or 140)

BIOL 142 — Marine Science  
(3) — CSU, UC  
Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Hours: 54 lecture  
Introduction to oceanography and marine biology: ocean properties, marine ecology of the tropics, poles, temperate and deep-sea regions, and marine environmental concerns.

BIOL 144 — Biogeography  
(3) — CSU  
Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Hours: 54 lecture  
Survey of the ecology and distribution of life on Earth.

BIOL 150 — Biodiversity  
(3) — CSU, UC  
Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Course Advisories: High school biology  
Hours: 54 lecture  
Diversity, adaptations and evolutionary history of life on Earth; principles of ecology and evolution. Examination of theories of systematics and nomenclature.

BIOL 151A-Z — Biodiversity  
(0.5-2) — CSU  
Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Course Advisories: High school biology  
Hours: 9-36 lecture  
Diversity, adaptations and evolutionary history of life on Earth; principles of ecology and evolution. Examination of theories of systematics and nomenclature. Courses currently available:

151L — Biodiversity: Insects and Allied Forms .................2
151S — Biodiversity: Birds .................................................2

BIOL 172 — Symbiosis  
(3) — CSU, UC  
Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Hours: 54 lecture  
Origins and nature of biological partnerships. Symbiotic relations from microbial landscapes to global ecology. Emphasis on ecological, behavioral and chemical exchanges between organisms and ecosystems.
BIOL 291 — Seminars in Biology
(2) — CSU
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 36 lecture

Topic or group of interrelated topics presented in seminar format by students enrolled in the course. Course content varies. Information on course content may be obtained from the Biological Sciences Department Office or SBCC Schedule of Classes. May be taken four times for credit. (*UC Transfer Limit: BIOL 291 computed as Independent Studies; please see counselor)

Independent Studies in Biology
For prerequisites and eligibility information, see “Independent Study” in the Catalog Index. In order to enroll in a BIOL 295 or 299 course, a student must have completed 12 units at SBCC with a GPA of 2.5 and a minimum of 6 units with a GPA of 3.0 in the Biological Sciences Department.

BIOL 295 — Internship in Biology
(1-4) — CSU
Limitation on Enrollment: Student must have completed 12 units at SBCC with a GPA of 2.5 and a minimum of 6 units with a GPA of 3.0 in the Biological Sciences Department.
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 48-273 lab

Structured, on-the-job experience in a field directly related to the student’s area of interest in the biological sciences.

BIOL 298 — Independent Reading in Biology
(1-4) — CSU
Limitation on Enrollment: Student must have completed 12 units at SBCC with a GPA of 2.5 and a minimum of 6 units with a GPA of 3.0 in the Biological Sciences Department.
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 48-192 lab

Independent literature search and/or reading of material on a topic in biology. A final report, including an annotated bibliography, is required. May be taken four times for credit. (*UC Transfer Limit: BIOL 298 computed as Independent Studies; please see counselor)

BIOL 299 — Independent Research in Biology
(1-4) — CSU

Limitation on Enrollment: Student must have completed 12 units at SBCC with a GPA of 2.5 and a minimum of 6 units with a GPA of 3.0 in the Biological Sciences Department.
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 48-192 lab

Independent, systematic research investigation of a problem in biology. A final report on research conducted is required. May be taken four times for credit. (*UC Transfer Limit: BIOL 299 computed as Independent Studies; please see counselor)

Bio-Medical Sciences

BMS 100 — The Human Body
(4) — CSU, UC*
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Course Advisories: High school science course
Hours: 108 (54 lecture, 54 lab)

Structure and function of the human body. Non-technical introduction to anatomy, physiology, exercise, fitness and nutrition. Laboratory experiments in human physiology; study of human anatomical materials. Satisfies SBCC General Education requirement in Natural Sciences. Satisfies Anatomy and Physiology requirements for SBCC LVN Program. Does not satisfy requirements for ADN majors. (*UC Transfer Limit: no credit for BMS 100 if taken after BMS 107 or 108 or 109; BMS 100, 107, 108, 109, and 146 combined: maximum credit, two courses)

BMS 107 — Human Anatomy
(4) — CSU, UC*
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 108 (54 lecture, 54 lab)

Structure of the human body. Laboratory includes study of a human anatomical specimen and comparative anatomy. Transferable to all four-year institutions, including nursing schools. Satisfies SBCC General Education requirement in Natural Sciences. (*UC Transfer Limit: BMS 100, 107, 108, 109 and 146 combined: maximum credit, two courses)
BMS 108 — Human Physiology
(4) — CSU, UC*
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Course Advisories: BMS 107
Hours: 108 (54 lecture, 54 lab)
Functions of the human body. Laboratory emphasizes recording physiological data from each student. Transferable to all four-year institutions, including nursing schools. Satisfies SBCC General Education requirement in Natural Sciences. (*UC Transfer Limit: BMS 100, 107, 108, 109, and 146 combined: maximum credit, two courses)

BMS 109 — Human Anatomy and Physiology
(5) — CSU, UC*
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 162 (54 lecture, 108 lab)
Structure and function of the human body. Laboratory study of anatomy of the human body by cadaver, comparative anatomy, charts and models. Satisfies SBCC General Education requirement in Natural Sciences. Satisfies Anatomy and Physiology requirement for SBCC ADN Program. (*UC Transfer Limit: BMS 100, 107, 108, 109, and 146 combined: maximum credit, two courses)

BMS 117 — Introductory Microbiology
(3) — CSU
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Course Advisories: BIOL 100 and CHEM 100 or CHEM 104
Hours: 90 (54 lecture, 36 lab)
Principles of microbiology and an introduction to micro-organisms. Not open to students with credit for BMS 127. Designed for allied health majors not interested in a baccalaureate degree.

BMS 118 — Human Microanatomy
(4) — CSU
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 108 (54 lecture, 54 lab)
Functional histology of the human body. Cell structure and function; architecture, control and integration of cells in tissues and organs. Survey of tissues of all major organs.

BMS 119 — Human Dissection
(1-3) — CSU
Prerequisites: BMS 107 or BIOL 102
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 48-162 lab
Directed dissection of human cadaver. May be taken for one to three units of credit per semester. Each unit of credit requires 48 hours laboratory work per semester. Graded Pass/No Pass only. May be repeated to a maximum of nine units of credit. (*UC Transfer Limit: computed as Independent Studies; please see counselor)

BMS 127 — Medical Microbiology
(5) — CSU, UC
Prerequisites: CHEM 101 or CHEM 104 or CHEM 155
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 162 (54 lecture, 108 lab)
Survey of general microbiology, with emphasis on characteristics of organisms associated with human disease—specifically, viruses, bacteria, rickettsia, yeasts, protozoa, helminthes and arthropods. Analysis of the interaction of host-parasite relationship.

BMS 128 — Human Nutrition
(3) — CSU, UC
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 54 lecture
Nutritional needs of the human body. Studies individual, local, national and world nutritional efforts.

BMS 128L — Human Nutrition Laboratory
(1) — CSU, UC
Corequisites: BMS 128
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 54 lab
Laboratory investigations of human nutrition; nutritional analysis of food; and guidelines for prevention of chronic diseases through diet.

BMS 136 — Biology of Human Sexuality
(3) — CSU, UC
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 54 lecture
Fundamental principles and current research focused on the anatomy and physiology of reproductive systems, hormonal control of reproductive cycles,
diversity of sexual responses, evolutionary origins of human sexuality, basic genetics and heredity, early human development, pregnancy, parturition, causes and treatments of infertility, sexually-transmitted infections, contraception, age-related changes in sexual function and behavior, sexual dysfunction and comparative sexual behaviors.

**BMS 146 — Human Form and Function**  
(3) — CSU, UC*  
*Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Course Advisories: College-level biology and chemistry  
Hours: 54 lecture  
Descriptive introduction to the structure and function of the human body. (*UC Transfer Limit: BMS 100, 107, 108, 109 and 146 combined: maximum credit two courses)

---

**Botany**

**BOT 100 — Concepts of Botany**  
(4) — CSU, UC*  
*Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Hours: 108 (54 lecture, 54 lab)  
Plant structure and function; the role of plants in the biosphere and society. Laboratory includes field studies. Designed for non-Biological Sciences majors with no prior general botany course. Satisfies SBCC General Education requirement in Natural Sciences. (*UC Transfer Limit: No credit for BOT 100 if taken after BOT 121; BOT 100, 121, and 122 combined: maximum credit, two courses)

**BOT 121 — Plant Diversity**  
(4) — CSU, UC*  
*Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Course Advisories: BIOL 100  
Hours: 108 (54 lecture, 54 lab)  
Plant diversity, adaptations and evolutionary history; principles of ecology and evolution. Satisfies SBCC General Education requirement in Natural Sciences. (*UC Transfer Limit: BOT 100, 121, and 122 combined: maximum credit, two courses)

**BOT 122 — Flowering Plant Identification**  
(3) — CSU, UC*  
*Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Hours: 90 (36 lecture, 54 lab)  
Botanical classification, methods of identification and recognition of important California plant species and families. (*UC Transfer Limit: BOT 100, 121 and 122 combined: maximum credit, two courses)

**BOT 123 — Field Botany**  
(3) — CSU, UC*  
*Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Hours: 80 (32 lecture, 48 lab)  
Flora, vegetation and major ecological features of natural ecosystems; field lectures, laboratories and camping. Five one-day field trips; a fee is charged. May be taken four times for credit. (*UC Transfer Limit: BOT 123 may be taken only once for transfer credit)

**BOT 129 — Survey of Earth’s Vegetation**  
(3) — CSU, UC  
*Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Hours: 54 lecture  
Diversity and structure of Earth’s vegetation types and associated environmental factors responsible for these natural associations. Consideration is given to the preservation, destruction and reconstruction of native vegetation.

**BOT 131 — Biology of Mushrooms**  
(1) — CSU  
*Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Hours: 24 (12 lecture, 12 lab)  
Six-week short course. Two hours lecture weekly. Twelve (12) hours field to be arranged. May be taken four times for credit.

**BOT 132 — Marine Botany**  
(1) — CSU  
*Skills Advisories: Eligibility for ENG 110 or ENG 110H  
Hours: 24 (12 lecture, 12 lab)  
Six-week short course beginning mid-semester. Two hours lecture weekly. Twelve (12) hours field to be arranged. May be taken four times for credit.
Environmental Studies

ENVS 110 — Humans and the Biological Environment
(3) — CSU, UC
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 54 lecture
Growth and variations in populations of organisms and their interactions with the physical environment. Characteristics of living natural resources and changes caused by expanding human populations and technological developments. Satisfies SBCC General Education requirement in Natural Sciences when combined with ENVS 111. (Required for the Environmental Studies major.)

ENVS 111 — Environmental Field Studies
(1) — CSU, UC*
Corequisites: ENVS 110
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 54 lab
Field studies designed to demonstrate general ecological/environmental principles through exposure to and analysis of many different communities and sites of environmental concern. Satisfies SBCC General Education requirement in Natural Sciences when combined with ENVS 110. (*UC Transfer Limit: no credit for ENVS 111 unless taken after or concurrently with 110)

Zoology

ZOOL 110 — Animal Physiology
(3) — CSU, UC
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 54 lecture
Animal function – “how animals work.” Investigates animals’ physiological systems, perception of and responses to external stimuli, integration of activities, maintenance of the internal environment, locomotion and reproduction.

ZOOL 122 — Animal Diversity
(3) — CSU, UC
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 54 lecture

ZOOL 123 — Animal Diversity Laboratory
(1) — CSU, UC
Corequisites: ZOOL 122
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 54 lab
Laboratory and field investigations of animals. Animal diversity, anatomy and physiology, principles of ecology and evolution. Satisfies SBCC General Education requirement in Natural Sciences when combined with ZOOL 122.

ZOOL 124 — Insect Biology
(4) — CSU, UC
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Hours: 108 (54 lecture, 54 lab)
Introduction to anatomy, physiology, ecology, behavior and diversity of insects and other terrestrial arthropods. Laboratory and field excursions emphasize identification, close-up photography and collection.

ZOOL 133 — The Natural History of Insects
(1.5) — CSU
Skills Advisories: Eligibility for ENG 110 or ENG 110H
Six-week short course
Hours: 48 (12 lecture, 36 lab)
Introduction to the natural history and identification of insects. Laboratory and field excursions emphasize identification, close-up photography and collection. May be taken four times for credit.
**ZOOL 137 — Ornithology**  
(3) — CSU, UC  
*Skills Advisories: Eligibility for ENG 110 or ENG 110H*  
3.3 hours lecture weekly  
*Hours: 54 lecture*  
Systematics, distribution, physiology, behavior, and ecology of birds. Emphasis on diversity, functional morphology and evolutionary history.

**ZOOL 138 — Biology of Birds**  
(1.5) — CSU  
*Skills Advisories: Eligibility for ENG 110 or ENG 110H*  
*Eight-week short course*  
*Hours: 40 (16 lecture, 24 lab)*  
Anatomy, physiology, evolution and behavior of birds. Field trips are timed to coincide with migratory periods and emphasize identification and classification. May be taken four times for credit.

**ZOOL 140 — Animal Behavior**  
(3) — CSU, UC  
*Skills Advisories: Eligibility for ENG 110 or ENG 110H*  
*Hours: 54 lecture*  
Introduction to animal behavior; methods and results of studies of invertebrate and vertebrate behavior; foraging strategies, social competition, sexual selection, mating systems, cooperation and social organization.
