Construction Technology

Degrees and Certificates
Associate in Science Degree: Construction Technology
Certificate of Achievement: Construction Technology

Program Description
Construction Technology offers a series of carpentry courses, green-collar training courses and electrician trainee courses. Beginning Construction (CT 110), the introductory course, is open to all students.

The advanced Construction Technology carpentry courses—Beginning Construction Trades (CT 111), Framing (CT 112), Roof Framing (CT 113), Beginning Finish Carpentry (CT 114), Intermediate Finish Carpentry (CT 115), Blueprint Reading (CT 116), Measuring and Calculating (CT 118), and Construction Remodel (CT 119)—are designed for students who have completed CT 110, or those with a minimum of one year of carpentry experience. Work Experience in Construction (CT 290) combines on-the-job training with classroom instruction.

Building Green (CT 122), Weatherization (CT 124) and Introduction to PhotoVoltaic Systems (CT 125) do not require any previous building classes.

Santa Barbara City College (Division of Apprenticeship Standards, Electricians Certification Unit Approved School #138) offers four Electrician Trainee courses as a “partial” General Electrician curriculum. The courses—Blueprint Reading for Electricians, Electrical Mathematics and Introduction to National Electrical Code—are designed for students working as electricians who want to prepare for the state certification exam and those required to be enrolled in order to continue working for a C-10 electrical contractor’s license.

For further information concerning the carpentry courses or the Electrician Trainee courses, contact Patrick Foster at (805) 455-3187.

Program Student Learning Outcomes
1. Use construction tools safely and efficiently.
2. Demonstrate knowledge of component systems of typical residence.
3. Build a typical construction structure (wall, roof, cabinet, etc.).
4. Install typical construction trim (fascia, base, crown, etc.).
5. Demonstrate understanding of the necessity and components of building science and green building.

AS Construction Technology
Degree Requirements

Department Requirements (41.1 units)
CT 110 — Beginning Construction .......................4.7
CT 111 — Beginning Construction Trades ...............4.7
CT 112 — Framing ........................................3
CT 113 — Roof Framing ....................................3
CT 114 — Beginning Finish Carpentry ................3
CT 115 — Intermediate Finish Carpentry ............3
CT 116 — Blueprint Reading ............................3
CT 118 — Measuring and Calculating .................3
CT 119 — Construction Remodel ....................4.7
CT 122 — Building Green ...............................6
CT 124 — Weatherization ..............................3

College Requirements
For complete information, see “Graduation Requirements” in the Catalog Index.

Certificate of Achievement:
Construction Technology

Degree Requirements (41.1 units)
CT 110 — Beginning Construction .......................4.7
CT 111 — Beginning Construction Trades ...............4.7
CT 112 — Framing ........................................3
CT 113 — Roof Framing ....................................3
CT 114 — Beginning Finish Carpentry ................3
CT 115 — Intermediate Finish Carpentry ............3
CT 116 — Blueprint Reading or .........................3
CT 118 — Measuring and Calculating or ..............3
CT 119 — Construction Remodel ....................4.7
Construction Technology Courses

CT 104 — Basic Construction Skills (3)
Hours: 70 (45 lecture, 25 lab)
Introduction to basic construction skills for residential wood construction. Designed for students interested in a career in home construction, focusing on career overview, safety, work ethics, tool use and basic framing.

CT 110 — Beginning Construction (4.7) — CSU
Hours: 144 (54 lecture, 90 lab)
Introduction to construction skills and concepts, with emphasis on residential wood construction. Designed for entry-level students interested in a career in the building trades. Topics include safety, planning, foundation, floor framing, wall framing, roof framing and siding.

CT 111 — Beginning Construction Trades (4.7) — CSU
Hours: 144 (54 lecture, 90 lab)
Introduction to basic construction skills and concepts of the sub-trades involved in residential wood construction: concrete work, roofing, sheetrock, insulation, plumbing and electrical. Overview of trades, designed for students interested in a career in home construction.

CT 112 — Framing (3) — CSU
Hours: 72 (45 lecture, 27 lab)
Intermediate-level class in rough framing skills and concepts in residential wood construction. Designed for continuing students who have taken CT 110 and for carpenters with some experience in residential framing. Topics include safety, foundations, framing hardware, exterior siding, special wall construction, stair framing and special topics in framing.

CT 113 — Roof Framing (3) — CSU
Hours: 72 (45 lecture, 27 lab)
Intermediate-level class in rough framing skills and concepts in residential wood construction, with emphasis on roof framing. Designed for continuing students who have taken CT 110 and for carpenters with some experience in residential framing. Topics include safety, layout, rafter design, rake walls and cornice treatment.

CT 114 — Beginning Finish Carpentry (3) — CSU
Hours: 72 (45 lecture, 27 lab)
Introduction to finish carpentry, with emphasis on residential wood construction. Designed for students who have already taken CT 110 or who have some prior experience in carpentry or construction. Topics include safety, tool care, door hanging, door and window easing, baseboard, crown molding, flooring, and close shelf and pole.

CT 115 — Intermediate Finish Carpentry (3) — CSU
Hours: 72 (45 lecture, 27 lab)
Intermediate finish carpentry, with emphasis on residential wood construction. Designed for students who have taken CT 110 or who have some prior experience in carpentry or construction. Topics include cabinet installation, cabinet construction, built-ins, paneling and wainscoting.

CT 116 — Blueprint Reading (3) — CSU
Course Advisories: Eligibility for ENG 98
Hours: 54 lecture
Introduction to blueprint reading in residential construction. Topics include understanding the uses of blueprints, types of plans, drafting conventions, contents of plans, focus on floor plans, elevations and sections, using the architectural scale, drafting simple plans, and shop drawings from plans.

CT 118 — Measuring and Calculating (3) — CSU
Skills Advisories: MATH 1
Hours: 54 lecture
Introduction to measuring and calculating used in residential wood construction. Topics include working with common and decimal fractions, using the standard tape measure, using a calculator for construction, estimating material, understanding the special
triangles used in roof rafter calculations, rafter length
calculation, and stair stringer calculation.

CT 119 — Construction Remodel
(4.7) — CSU
Hours: 144 (54 lecture, 90 lab)
Theory and skills for residential home remodeling.
Designed for continuing students who have taken
CT 110 and carpenters with some experience in
residential construction. Topics include design, planning,
demolition, tie-in, green applications and safety.

CT 121 — Blueprint Reading for Electricians
(3) — CSU
Skills Advisories: Eligibility for ENG 98 and 103
Hours: 54 lecture
Overview of blueprints, plans and specifications;
symbols used in electrical-related trades; preparation
and use of as-built drawings, wiring and line diagrams,
schematics and ladder diagrams. Approved School
#138 for California Electrician Trainees.

CT 122 — Building Green
(6) — CSU
Hours: 108 lecture
Overview of Green Building approach to design, planning
and construction details in sustainable building. Includes
site protection, water conservation and management,
energy efficiency, solar heating and PV, material
efficiency, deconstruction, insulation, indoor air quality,
building performance and alternative building techniques.

CT 123 — Outdoor Structures
(3) — CSU
Hours: 72 (45 lecture, 27 lab)
Designing and building outdoor structures (trellises,
pergolas, gazebos, sheds, gateways, decks, etc.).
Topics include foundations, finished framing, roofs,
hardware, joints, weatherproofing, etc.).

CT 124 — Building Performance
(3) — CSU
Hours: 72 (45 lecture, 27 lab)
Overview of building performance (assessment,
diagnosis and remediation) in residential construction.
Topics include building science, diagnostic testing,
visual inspection, remediation, customer relations and
business and job opportunities.

CT 125 — Introduction to Photovoltaic Systems
(3) — CSU
Hours: 90 (36 lecture, 54 lab)
Overview of Photovoltaic (PV) systems and installations.
Topics include solar radiation, site survey, system
components and configurations, batteries, inverters,
system sizing, mechanical and electrical integration.

CT 127 — Sustainability Audit
(3) — CSU
Hours: 72 (45 lecture, 27 lab)
Overview of whole-house or sustainability audit
(energy, water, indoor air quality, landscape) in
residential construction. Topics include: career
and business opportunities, comprehensive audit
categories, the audit process, auditing tools and
diagnostic tests, site inspection, surveys and
recommendations.

CT 128 — Beginning Plumbing
(3) — CSU
Hours: 72 (45 lecture, 27 lab)
Overview of plumbing in residential construction.
Topics include supply and DWV systems, materials,
connections, tools used, fixtures, code requirements, etc.

CT 129 — Construction Estimation
(3) — CSU
Hours: 54 lecture
Introduction to estimating in residential construction.
Topics include current estimation programs, software,
material and labor calculations, take-offs from
blueprints, carpentry and other-trade estimating, etc.

CT 130 — Contractors License Preparation
(3)
Hours: 54 lecture
Combination online and mandatory in-class course,
divided into two eight-week sessions: law and trade.
Prepares the student for taking the California State
Contractors License Exam in the General Contractor
(B-1) category.
CT 132 — Lighting Systems  
(3) — CSU  
*Hours: 54 lecture*  
Basic function, operation, installation and characteristics of various lighting systems.

CT 133 — Motors, Motor Controllers, and Process Controllers  
(3) — CSU  
*Hours: 54 lecture*  
Basic function, operation, installation and characteristics of various types of motors (AC, DC, dual voltage, repulsion, universal, 3-phase, Squirrel Cage, Synchronous).

CT 134 — Transformers  
(3) — CSU  
*Hours: 54 lecture*  
Basic function, operation, installation and characteristics of transformers.

CT 135 — Grounding Systems  
(3) — CSU  
*Hours: 54 lecture*  
Basic function, operation and characteristics of grounding systems.

CT 136 — Electrical Theory  
(3) — CSU  
*Hours: 54 lecture*  
Basic electrical theory topics include ohms law, series/parallel circuits, voltage, magnetism, 3-phase systems, AC/DC theory, inductance and capacitance, etc.

CT 137 — Specialty Systems  
(3) — CSU  
*Hours: 54 lecture*  
Basic function, operation and characteristics of specialty electrical systems. Topics include fire alarms, security alarms, voice/data/tv/video, signaling systems, lighting protection systems, fiber-optic systems, etc.

CT 139 — Construction Project Management  
(3) — CSU  
*Hours: 54 lecture*  
Introduction to managing projects in residential construction. Topics include overview of management programs and software, bidding, preconstruction set up, project budget, daily work plan, team roles, safety plan and job completion.

CT 153 — Electrical Mathematics  
(3)  
*Skills Advisories: MATH 1*  
*Hours: 54 lecture*  
Basic mathematics and its application to electrical and other technologies. Topics in arithmetic, common fractions, decimal fractions, percentages, graphs, measurement and introduction to algebra are covered. Approved School #138 for California Electrician Trainees.

CT 194 — Introduction to National Electrical Code  
(3)  
*Skills Advisories: Eligibility for ENG 98 and 103*  
*Hours: 54 lecture*  
Layout and content of the *National Electric Code*. Purpose, intent and scope of electrical codes, as well as utilization and application. Also includes use of the Code for calculations and hazardous locations. Approved School #138 for California Electrician Trainees.

CT 196 — Jobsite Management  
(3) — CSU  
*Skills Advisories: Eligibility for ENG 98 and 103*  
*Hours: 54 lecture*  
Introduction to jobsite supervision in the construction industry. Includes industry organization, documentation and record-keeping, personnel and financial management, as well as job planning and safety. Approved School #138 for California Electrician Trainees.

CT 290 — Work Experience in Construction  
(1 – 4) — CSU  
*Hours: 60-300 lab*  
Work experience on a construction job or project, plus attending one orientation and a monthly meeting. Students perform assigned responsibilities as an employee, follow employer’s rules, regulations and policies, write learning objectives, keep a record of time worked on a student data sheet, and secure employer's evaluation at the end of the semester.
