Health IT Workforce Training Program
Clinician/Practitioner Consultant

************************************************
Do you have a health care license or credential or experience?
Do you have experience with computers?
Are you interested in working with electronic health records?
************************************************

If you answered yes to these questions, then you may be a good candidate for SBCC's new training program. The five-month Health IT Workforce training program will prepare licensed/credentialed professionals to work as Clinician/Practitioner Consultants in the implementation of electronic health records (EHR) systems.

When will the training begin? Next session begins 8/22/11-12/9/11; Additional sessions begin 10/17/11-3/16/12 ;1/23/12-5/19/12

What is the method of delivery? 100% online. SBCC’s Health Information Technology Department was the first 100% online Health Information Technology program in the country.

How much does it cost? For California residents, enrollment fees are $36 per unit. For the first 150 students $312 of the ENROLLMENT FEES WILL BE REIMBURSED upon successful completion of the program!

What are the prerequisites to enter the training?

- Must have healthcare-related experience and/or hold a license or credential (such as RN, RT, PT, RHIT, CCS)
- Must be committed to an intensive training program of at least 14 units of course work in less than six months
- Course work or knowledge related to computers is STRONGLY advised
- Must submit the Santa Barbara City College Application
- Must submit the supplemental Health IT Workforce Training Program Application
- Priority is given to eligible US Veterans and spouses.

Details of the Grant:
U.S. Department of Health and Human Services Grant, CFDA Number 93.721 project is part of a nationwide training effort utilizing community colleges throughout the country to provide 6-month training programs using curricula developed and distributed to participating colleges. The purpose of the effort is to prepare a workforce to assist in the implementation of the conversion from paper to electronic health records in doctors’ offices and clinics throughout the country.
