This applicant has applied for admission to the Marine Technology Program at Santa Barbara City College for training in commercial diving as a topside diving team member and as a diver. The applicant should complete the Commercial Diving Medical History Form prior to the exam.

All candidate diving personnel must undergo a thorough physical examination prior to being exposed to hyperbaric conditions. Subsequent to the initial examination, all diving personnel are required to be re-examined at 12-month intervals.

The examining physician should interpret any physical findings on the basis of the kind of occupation to which the applicant aspires. For example, a position as an air diver requires a less extensive examination than does a position as a saturation diver, but more extensive than that required for topside personnel. With this as a frame of reference, the applicant's cardio-vascular, gastro-intestinal, genito-urinary and neuro-muscular systems should be assessed to determine if the physical exertion necessitated by the type of diving planned will be harmful to the organ system in question, and if the condition of any organ system would make it difficult or impossible for the prospective diver to carry out the planned exercise or exertion.

**OPTIONAL TESTS**: Additional laboratory procedures may be employed at the discretion of the examining physician depending upon the strenuousness of the anticipated diving operations. These may include: Stress electro-cardiography, tests demonstrating sensitivity to oxygen and carotid sinus sensitivities, full chest film, pulmonary function tests (i.e., one-second times vital capacity and tests for air trapping), audiogram, radiographic examination for dysbaric osteonecrosis, special blood studies and electro-encephalography.

**PHYSICIAN QUALIFICATIONS**: The examining physician must be familiar with and experienced in the physical requirements and medical aspects of compressed gas diving. In the absence of an examiner with knowledge of hyperbaric medicine, examinations should be made by a physician who understands the need and purpose of the examination, and who has had prior experience in examining individuals who will be exposed to strenuous work conditions and hazardous environments. The “Association of Diving Contractors Consensus Standards for Commercial Diving Operations” section III-B provides examination standards which may be used as a basis for completing the examination. All completed physical examinations will be forwarded by the SBCC Marine Technology Department or to the department's Medical Review Officer for review, prior to final approval.

**EXAMINATION**: (To be completed in its entirety by the Physician). Please examine each of the items below. If considered abnormal indicate under “remarks” the pertinent details.

1. General Appearance .................................................................
   (inc. obesity, gross defects, postural abnorm.)
2. Head and neck .................................................................
3. Eyes (inc. visual acuity for glasses).................................
4. Nose and sinuses.............................................................
5. Ears ........................................................................
   (inc. visual acuity, need for glasses Rx)
6. Spine ........................................................................
7. Lungs and chest ..............................................................
8. Heart .................................................................
9. Abdomen & Viscera ...........................................................
10. Inguinal rings ..............................................................
11. Genitalia ........................................................................
12. Anus and rectum ...........................................................
13. Upper extremities ...........................................................
14. Lower extremities ...........................................................
15. Neurologic ....................................................................
16. Skin reactions or eruptions ............................................
17. Psychiatric (inc. emotional stability) ..............................
18. Chest X-Ray ..............................................................
19. Eye grounds exam ..........................................................
20. Mouth and throat ...........................................................
21. Vital Capacity ..............................................................
22. C.B.C. -(attach report) ...................................................
23. U/A- (attach report) .....................................................
24. Drug screening (attach report) .......................................

COMMERCIAL DIVING MEDICAL HISTORY FORM

SPECIAL INSTRUCTIONS:
It is important that this form be **completed fully** using ink. Complete this form front and back, and give to your attending physician at the time he/she examines you. He/she will then complete the **COMMERCIAL DIVING PHYSICIAN’S EXAMINATION REPORT**. Both the completed **Commercial Diving Medical History Form** and **The Commercial Diving Physician’s Examination Report** are then submitted to the Marine Technology Department along with the required lab reports attached. **THE COMPLETED PHYSICAL EXAMINATION FORMS ARE REQUIRED PRIOR TO BEGINNING OPENWATER COMMERCIAL DIVING TRAINING AND FOR SUBSEQUENT INDUSTRY CERTIFICATION.** Incomplete examination reports will not be accepted. You may contact the Marine Technology Department for name(s) and addresses of diving physicians in your area.

Name ____________________________________________________________________ Age __________ Sex _________
Address ___________________________________________________________________ Telephone _____________________
Height _____________ Weight _____________ Date _________________________

To the Applicant:

**PHYSICAL EXAMINATION REQUIREMENTS**

Diving requires you to be in top physical condition. The effects of hyperbaric exposure, cold water, pressure, waves, currents, etc., are a constant strain on the body. A thorough commercial diving physical examination is required before you begin openwater commercial diving training, and **required to be followed up every twelve months**, with emphasis on the following:

**EARS** – No permanent perforations of the ear drums, no predisposition to external ear infections, open eustachian tubes (ability to equalize pressure differences across to ear drums).

**NOSE & THROAT** – Applicant should have no history of chronic tonsillitis, colds and/or other throat infections or sinusitis.

**RESPIRATORY SYSTEM** – Absence of respiratory conditions that result in poor ventilation or in breathing difficulty. History of Asthma may be disqualifying and applicant should be examined by a M.D. who is experienced in Diving Medicine. Additional testing may be necessary for individuals with a history of respiratory ailments.

**CIRCULATORY SYSTEM** – The heart should be of normal size and location; heart sounds should be normal; circulatory system tone and response to exercise should be normal.

**NERVOUS SYSTEM** – Reflex response and psychomotor tension should be normal.

**SUBSTANCE ABUSE**- Use of drugs and/or alcohol abuse are a contraindication to diving and are not permitted by those participating in diving related activities. In addition, to ensure a drug free and safer workplace, random drug testing is part of the MDT department drug policy for all enrolled students. Students will be participating in industrial activities, diving and life-support operations.

**PRESCRIPTION DRUG USE**- Certain prescription drugs and medications may pose a contraindication to diving. While side affects may be minimal or non-existent in a non-hyperbaric environment, they may pose significant dangers or unknown side affects in a hyperbaric or aquatic environment where gas partial pressures and tissue absorption rates are changing. List all prescription drugs or medications you are using under “Remarks” on the reverse side and disclose them to the physician.

**EYES** – Eyes should show a normal accommodation to light and distance.

**TEETH & MOUTH** – Malocclusions or other oral conditions that might prevent a solid comfortable grip on a mouthpiece

**BACK/SPINE** – Any injury to the back/spine may be disqualifying for certain diving related occupations and applicant should be examined by a M.D. who is experienced in Diving Medicine. Some employment firms give back X-rays as part of their pre-employment physical exam.

**Following recovery from operations, serious illnesses, severe colds, etc., a physical examination is required to be taken for clearance to dive or enter a hyperbaric environment.**

I fully understand the above requirements. __________________________________________________________________________

Applicant's Signature __________________________ Date ______________________
NAME

1. Have you had any previous diving experience? __________ Have you done any flying? __________ If so, did you often have trouble equalizing pressure in your ears or sinuses? __________ Do you experience unusual discomfort in your ears at the bottom of a swimming pool? __________
2. Do you participate regularly in active sports? __________ If so, specify what sport(s). If not, indicate the type of exercises you normally do. __________
3. Have you ever been refused insurance, rejected or discharged from the armed forces, or denied employment for medical reasons? __________ If so, explain why: __________
4. Have you ever been refused admission, rejected or terminated from any other diving school? ______ If so, explain why: __________
5. When was your last physical examination? Month ______ Year __________
6. When was your last chest X-ray? Month ______ Year ______
7. Have you ever had an electrocardiogram? __________; and electroencephalogram (brain wave study)? __________
8. Do you have a history of asthma? __________ Do you have active asthma at the present time? __________ If you answer "yes" to either question, please describe fully in the "remarks" section below.
9. Do you have a history of back trouble or injury to your back/spine? ______ If so, describe fully in the "remarks" section below.
10. Do you have any history of food poisoning, stomach ache lasting more than a day or two? __________
11. Do you have any metal pins, plates or devices implanted in your body? __________
12. Do you have any learning disabilities? __________
13. Have you ever been refused insurance, rejected or discharged from the armed forces, or denied employment for medical reasons? ______ If so, explain why: __________
14. If you have ever been refused admission, rejected or terminated from any other diving school? ______ If so, explain why: __________
15. Are you currently using any medications or drugs? __________

HAVE YOU HAD: (If answer is yes, describe fully and in detail showing date in "remarks" section below.)

10. Frequent colds or sore throat __________
11. Hay fever or sinus trouble __________
12. Trouble breathing through nose, other than during colds __________
13. Painful or running ear, mastoid trouble, broken eardrum __________
14. Shortness of breath after moderate exercise __________
15. Chest pain/persistent cough __________
16. Any indication of blood disease __________
17. Spells of fast, irregular or pounding heartbeat __________
18. High or low blood pressure __________
19. Any kind of heart trouble __________
20. Frequent upset stomach, heartburn, or indigestion; peptic ulcer __________
21. Frequent diarrhea or blood in stools __________
22. Stomach or back ache lasting more than a day or two __________
23. Kidney or bladder disease; blood sugar or albumin in urine __________
24. Recent gain or loss of weight or appetite __________
25. Jaundice or hepatitis __________
26. Tuberculosis __________
27. Rheumatic fever __________
28. Syphilis or gonorrhea __________
29. Broken bone, serious sprain or strain, dislocated joint __________
30. Any indication of bone disease __________
31. Rheumatism, arthritis, or other joint trouble __________
32. Severe/frequent headaches __________
33. Head injury causing unconsciousness __________
34. Dizzy spells, fainting spells, or fits __________
35. Trouble sleeping, frequent nightmares, sleep-walking __________
36. Nervous breakdown or periods of marked nervousness __________
37. Dislike for closed-in spaces, large open places or high places __________
38. Any neurological condition __________
39. Train/sea/or air sickness __________
40. Any drug or narcotic habit (including regular use of sleeping pills; Benzedrine, etc.) __________
41. Alcoholism, or any drug or narcotic habit __________
42. Any learning disabilities __________
43. Any serious accident, injury or illness not mentioned above. If so, describe __________

REMARKS: (Use additional sheet, if necessary)

I hereby certify that, to the best of my knowledge, I have answered all questions correctly and that I have disclosed all pertinent data in the "remarks" section to all applicable questions that I have answered "yes." I further understand that if I failed to reveal any of my prior medical history, such omission could have an adverse effect on my application to the Marine Technology program, safety as a diver/trainee and my future employability as a Commercial Diver. Intentional omissions or misrepresentations will disqualify the applicant for acceptance and any subsequent application may be denied.

CONTRAINDICATIONS

ABSOLOUTE DISQUALIFICATION. Contraindications include:

1. Definite emotional instability or mental retardation
2. Subject to faintness or blackout (i.e., epilepsy, brittle diabetes, dysrhythmias, synocopal attacks)
3. Subject to pneumothorax (i.e., previous pneumothorax, bleb, cystic or obstructive disease of the lungs)
4. Certain cardiac abnormalities (i.e., pathological heart block, valvular disease, interventricular septal defects)
5. Active asthma
6. Diabetes
7. Abnormal findings on drug screening

RELATIVE DISQUALIFICATION. Contraindications include:

1. Gross obesity
2. History of neurological decompression sickness
3. Perforation of tympanic membrane
4. Grossly impaired hearing – A hearing loss of either ear of 35 dB or more, at frequencies up to 3000 Hz and 50 dB or more, at frequencies above 3000 Hz to minimum of 6000 Hz is an indication for referral of the candidate to a specialist for further opinion.
5. History of severe motion sickness
6. Seriously impaired pulmonary function
7. Pulmonary fibrosis
8. Chronic alcoholism
9. Peptic ulcer
10. Chronic hepatitis
11. Sickle cell anemia
12. Disabilities requiring certain medications for control (proper prescription medications may be a contraindication)
13. Renal colic caused by kidney stones
14. Pregnancy
15. Evidence of neurosis, recklessness, accident proneness or panicky behavior
16. Metal pins, plates or devices implanted in the body
17. Abnormal findings on drug screening. (i.e. testing positive on D.O.T. SAMSHA Panel 5 screen)

TEMPORARY DISQUALIFICATION. Contraindications include:

1. Acute alcoholism or drug intoxication
2. Acute gastrointestinal syndrome
3. Acute infections of skin, upper respiratory, ear, etc.
4. Recent incident of serious decompression sickness

PHYSICIAN'S RECOMMENDATION- check one of the following:

☐ APPROVAL: I have thoroughly reviewed the applicant's Medical History form attached herewith. I have thoroughly examined the applicant and attached lab reports as required by this report. I have found no defects which I consider to be incompatible with industrial diving and hyperbaric exposure. **I have found no contraindications to diving.**

☐ CONDITIONAL APPROVAL: (No compressed gas dives or chamber runs will be permitted until approval becomes unconditional. State conditional reasons below:)

________________________________________________________________________________________________
________________________________________________________________________________________________
________________________________________________________________________________________________

☐ DISAPPROVAL: The applicant has defects which, in my opinion, clearly would constitute unacceptable hazards to health and safety in diving.
