

The issues and problems that are at Santa Barbara City college is that there are still a lot of people who struggle to come out and express themselves. This is because there is still not a lot of resources for them to turn to for them to express themselves fully. I am the best candidate because of how many people I talk to and how I can communicate with them having the ability to publicly speak about these issues and come up with solutions for them. What innovations that would implement ASG to improve accessibility, transparency and efficiency is having the way to reach out to students better and finding ways for students to come and ask ASG what would be better for them if they are international students, local students from incoming high schools or any student that joins SBCC.
