

As the Student Trustee, I would like to represent the interests of the student body to the board, and ensure that students are taken into account when decisions are made institution-wide. The main values that I want to maintain are diversity, inclusivity, and equity. Regardless of their color, gender, religion,.. I want students to feel represented, and to do so, I will make sure that they all are able to communicate their point of views. My strategy is to view campus policies, and help students to understand them, because knowing their rights, will help them exercising them. An issue at Santa Barbara is housing. A lot of SBCC students struggle finding a place to live, which is not normal. To address that, I would like students to have the chance to talk about it. So the main thing would be an improvement in communication. I would like to implement boxes on every SBCC campus. In those boxes, with the ASG logo, a brief description of what the box is about, pen and papers on it, students could write their suggestions, concerns, .. I also want to implement a newsletter every other week, and add a google form to it, so that students could constantly communicate with us. I am the best candidate for the Student Trustee position because I really want to ensure smooth communication, and be the students' voice in important environments, such as the Board Of Trustees. Additionally, I am currently the Commissioner of Accessibility, as well as the president of the Women For Success club.
