

As a candidate for Vice President of Internal Affairs, I see this role as an opportunity to transform our Associated Student Government into a more efficient, transparent organization that can represent SBCC students.

The foundation of an effective student government lies in proper training and preparation. Currently, many officers begin their terms without adequate orientation, leading to confusion and delays. My first initiative will be creating a comprehensive training program to equip all new members with the knowledge and tools they need to succeed from day one.

Accountability remains essential for any successful organization. I will introduce regular performance evaluations for officers and committees, establishing a culture where feedback drives improvement. By setting clear expectations and tracking progress, we can maintain high standards while identifying areas for growth. This system will ensure ASG remains focused on serving students effectively.

Transparency must be at the core of everything we do. I will work to simplify internal processes and improve communication between all ASG branches. More importantly, I'll create multiple channels for student input, including open forums, digital surveys, and accessible office hours. Every student deserves to feel their voice is heard in decisions that affect them.

This campaign is about building an ASG that works for everyone. With your support, we can create a student government that listens, adapts, and delivers real results. I ask for your vote to make this vision a reality. Together, we can build an ASG that truly serves all SBCC students.
