

Elizabeth Wilmer - President

Pinpointing the needs of a Santa Barbara City College student is difficult. SBCC welcomes students from not only different places but ones at all different points in their education. I want to commit to growing SBCC to all its potential as the President of the Associated Student Government. The life of a community college student is complicated as many of us juggle so much more than school including work, finances, family matters, and housing. The current hot food cafeteria access (closing at 1:30pm) and Library hours (closing at 8 and closed on weekends) are two resources that do not support the lifestyle of a SBCC student. As elected president I will work to extend our SBCC food programs and improve upon these hours in any way possible. We must focus on building a sense of community which is an area that SBCC lacks in. As elected president I will work to increase student life such as campus events. I will work to improve communication as SBCC already has so many great resources that many students don't know about. For this role, organization and dedication are key and I believe I have the motivation to hold both. This past year I've been a member of ASG from the role of Secretary and Vice President of Internal Affairs and have seen the inner workings of the ASG. My experience in balancing a busy schedule of sports, work, school, and a large family has taught me how to work efficiently with others and develop communication skills. I believe that it's my listening skills, organization, work ethic, but most importantly determination that sets me apart and is why I am a prime candidate for President in the Associated Student Government at SBCC.
